Training Course on Patient Care Management for Medical Social Workers

**20th to 24th March
2023**

Department of Social Sciences
The National Institute of Health and Family Welfare
Munirka, New Delhi, 110067

Introduction

Social worker is a member of health care team who creates a network among the doctor, patient, family and the community. A social worker, working in health sector deals with psycho – social elements related with patients health conditions and community health issues. The social aspects of illness are recognized in ways which fostered team work in patient care.

The role of social worker in health sector includes interdepartmental coordination, multidisciplinary teamwork, management of financial assistance, counseling and emotional support to the patient and his/her family members. They also help patients and their families to understand the illness and available treatment options, as well as the consequences of various treatments. Social worker assists in rehabilitation, psychosocial and economic assessment of patient, coordinates patient discharge and continuity of health care planning. Health promotion activities, community education, and referral to community resources are also part of their duties.

Social workers have active involvement and participation in global and national health challenges like natural disaster, epidemic and pandemic. Social worker helps to solve social problems in patients and their families to ensure their better health as well as well-being to enhance the patient satisfaction.

In response to these evolving health priorities NIHF is organizing a training programme for social workers to develop their knowledge and skills to execute their role and meet the changing demands of health care delivery system in India and achieve the goals of National Health Mission.

General Objective
